

VACANCY

BUTTERFLY VENT SMART CLIMATE GREENHOUSE SUPERVISOR

ABOUT DAURES GREEN HYDROGEN CONSORTIUM:

Located in the heart of the Erongo region is Namibia's largest constituency that will house the **Daures Green Hydrogen Village** - Africa's first Net Zero community. The project will showcase the sustainable production of green hydrogen and ammonia from renewable sources, demonstrate green hydrogen applications, and pilot a green hydrogen economy with export potential for hydrogen derivatives while creating research opportunities for local and international students. Notably, the project aims to produce Namibia's first green hydrogen and ammonia in 2023 with the completion of its pilot phase. The project will also produce Namibia's first carbon-free agriculture.

Subsequent phases will spear the village to house over 2000 residents, generate over 1 GW of clean energy, and produce over 350 000 tons of green ammonia. The Daures Green Hydrogen Consortium is looking to grow its team and as such The **Daures Green Hydrogen Consortium** intends to employ a Butterfly Vent Smart Climate Greenhouse Supervisor to join its team.
